

Project Description

Jimmy John's Franchise, LLC is a franchised sandwich restaurant chain, specializing in delivery. Founded by Jimmy John Liautaud in 1983 and headquartered in Champaign, Illinois, in 30 years, the company has grown to more than 2,500 locations in all states except Alaska, Connecticut, Hawaii, Maine, New Hampshire, Rhode Island & Vermont. Jimmy John's has opened approximately 200 locations per year over the past three years. As of 2014, 98% of the locations are franchise-owned.

Jimmy Johns was in search of a wireless sensor system for all their critical refrigeration and kitchen systems. They needed to ensure the integrity of their cold chain units at all times. Additionally, they wanted to be able to have access to real-time information regardless of time of day.

Utilizing the Swift Sensor Bridge 1010 along with Swift Sensor wireless temperature sensors, all Jimmy Johns staff are now capable of viewing this real-time information in one screen and from their mobile devices ensuring that all is well at their facilities.

Products	
Swift Sensors Bridge	SS-BRG-1010 Standard Bridge
Types of Sensors	SS-SEN-102 Wireless Temperature Sensor SS-SEN-105 Wireless Remote Temperature Sensor
