

Project Description

The Andersen Company has become a leader in the development and production of solution based high performance mat products. With a commitment to high quality and innovation, they are continuously developing new technologically advanced mats that are unparalleled in quality and performance.

The Andersen Company was in search of a wireless sensor system a variety of functions within the factory. They needed to ensure the integrity of their fabrication stations at all times. The Andersen Company also wanted to optimize their factory workflows. Additionally, they wanted to be able to have access to real-time information regardless of time of day.

Utilizing the Swift Sensor Bridges 1010 along with Swift Sensor wireless temperature, door, vibration and Voltage Detection sensors, the Andersen Company is now capable of viewing their real-time information in one screen and from their mobile devices ensuring that all is well at the factory.

Products	
Swift Sensors Bridge	SS-BRG-1010 Standard Bridge
Types of Sensors	SS-SEN-102 Wireless Temperature Sensor
	SS-SEN-105 Wireless Remote Temperature Sensor
	SS-SEN-201B Wireless Vibration Sensor
	SS-SEN-301 Wireless Door Sensor
	SS-SEN-611 Wireless Voltage Detection Sensor
